JOB DESCRIPTION: This is investigative and protective services work involving the prevention and suppression of both structural and aircraft fires and the conduct of crash rescue operations.

JOB DUTIES: Responsibilities include firefighting, performing crash rescue activities and operating and maintaining firefighting equipment. This work requests the functioning as a member of a team and involves potential life threatening situations. This class is differentiated from other firefighting classifications in that positions in this class must be trained to respond to airfield rescue firefighting situations and to use and maintain specialized equipment and vehicles employed in airfield rescue firefighting.

KNOWLEDGES/SKILLS/ABILITIES:

- Knowledge of structural and aircraft firefighting and rescue methods and techniques
- Knowledge of the types and uses of specialized firefighting and rescue vehicles, equipment, agents and protective clothing
- Knowledge of the construction features and location of operating systems on all types of civilian and military aircraft to include jet aircraft, helicopters and various types of transient aircraft
- Knowledge of basic emergency medical procedures and practices
- Knowledge of basic hazardous materials spill cleanup methods and techniques
- Knowledge of safety and clean up equipment used in containing hazardous materials
- Knowledge of First Aid/First Response level medical methods and techniques
- Knowledge of state and federal emergency communications network and teletype systems
- Ability to operate firefighting and rescue vehicles used to respond to aircraft emergencies and disasters
- Ability to use specialized firefighting and rescue equipment
- Ability to perform First Aid/First Responder procedures
- Ability to perform routine maintenance on vehicles and equipment
- Ability to work in stressful and potentially dangerous situations
- Ability to lift heavy objects and climb and maneuver in and around high and confining areas
- Ability to use and operate various communications equipment
- Ability to read and comprehend aircraft operations manuals and schematics

MINIMUM REQUIREMENTS: Three (3) years experience in an organized fire department. Preference will be given to candidates who have previous experience in aircraft firefighting and rescue. Graduation from a certified Military Firefighter Academy can be substituted for three (3) years' experience.

SPECIAL LICENSING/REGISTRATION/CERTIFICATION REQUIREMENTS:

- Training in handling hazardous materials leading to a Certification in HAZMAT – Operations Level, Training in First Aid/First Responder Level.
- Must have achieved a Level 5 state of proficiency in the AFC 3E751 Specialty. (Completion of a six year term of enlistment in the Maine Air National Guard will be required if applicant has not achieved Level 5 state of proficiency)
- Must meet NFPA 1582 Firefighter Candidate Medical Evaluation Standards
- Must be eligible for an receive appropriate security clearance from the US Air Force and the Federal Aeronautics Administration
